

**CALIBRE ADVANCED ENGINE FLUSH** is a very high quality formulation comprising of a concentrated hydrocarbon dispersant additive package together with a solvent base technology which is compatible with all engine metals and seal materials.

## APPLICATION

200ml treats an engine with 4-6ltr engine oil capacity.

Add contents of the bottle to a warm engine via the oil filler cap and allow engine to run for 5 minutes. Drain the old oil and dispose of in the usual way, change the oil filter and refill with the correct grade of fresh oil.

## FEATURES/BENEFITS

- Suitable for both petrol and diesel engines, with or without catalysts and particulate filters.
- Quickly and efficiently removes deposits of sludge, varnish and other contamination left by old oil.
- Ensures optimum internal engine cleanliness before re-filling with fresh engine oil.
- Facilitates thorough draining of used oil during oil changes.
- Ideal for use where a late or missed oil change is suspected, or vehicle service history is unknown.
- Compatible with all types of synthetic and mineral engine oils.

## TYPICAL PROPERTIES

Appearance:	Light brown liquid
Odour:	Aromatic
Vapour density:	> 1 (Air = 1)
Relative density:	0.8 – 1 (Water = 1)
Flashpoint:	Not available - Hydrocarbons, C10, aromatics, <1% naphthalene: > 61°C (closed cup)
Upper/lower flammability:	Not available - Hydrocarbons, C10, aromatics, <1% naphthalene: 0.6% – 7.0% (v/v)

## HEALTH AND SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Safety Data Sheet is available on request.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
