Product Code: AE08011

SYNMAX ULTRA ECO 5w20 is a premium full synthetic, fuel-efficient engine oil primarily designed to meet the stringent FORD requirements for the EcoBoost engines.

APPLICATION

Formulated primarily for use in FORD vehicles fitted with EcoBoost petrol engines where lubricants requiring FORD M2C-948B specification are required. Backwardly-compatible to make it also suitable for use where earlier FORD requirements M2C-913B and M2C-913C are specified.

Also recommended for use where oil to meet FORD M2C-925B is required, and in the latest generation of high performance JAGUAR/LAND ROVER 5.0L V8 petrol engines which require oil to M2C-925A and STJLR.03.5004 standards.

In case of doubt, please refer to vehicle handbook to ensure correct oil specification requirement.

BENEFITS

- Meets latest stringent FORD requirement for enhanced fuel economy capabilities in EcoBoost engines.
- Designed to cope with severe service in high performance JAGUAR and LAND ROVER vehicles.
- Exceptional low temperature performance.
- Enhanced stay-in-grade properties ensure low levels of volatility across the whole service period.

PERFORMANCE PROFILE

Suitable for use where the following specifications are required;

- ACEA A1/B1
- API SN/CF
- FORD M2C-948B (EcoBoost)
- FORD M2C-925B
- FORD M2C-925A (Jaguar/Land Rover)
- Jaguar/Land Rover STJLR.03.5004
- FORD M2C-913B/C

TYPICAL PROPERTIES

Kinematic Viscosity @ 100°C:	8.0	Viscosity Index:	162
TBN, mg/KOH/g:	8.2	Sulphated Ash %:	<0.8

HEALTH & SAFETY

This product has been manufactured to the highest standards and when used for the purpose recommended is unlikely to present any significant health hazards. A Material Safety Data Sheet is available.

Indicated data are approximate values and are subject to the usual commercial fluctuations. All information correct at time of going to press to the best of our knowledge. This information may be subject to change without notification due to continual product research and development.
