

FOOD GRADE BELT DRESSING

Food Grade Belt Dressing is a foodsafe, colourless, tacky, viscous Category H1 NSF Registered Lubricant formulated using only FDA listed ingredients. It is designed to prevent slipping and increase transmitted power to all drive and conveyor belts. It is suitable for use on all types of belts, V, round and flat, regardless of size or running speed. Food Grade Belt Dressing helps prevent glazing and cracking, staining or build-up of grease and dirt and is safe to use on leather, rubber, canvas, silicone and P.T.F.E. proofed belts. Category H1 Registered for use in all Food Plants, Meat Plants, Dairies, Bakeries, Canneries, Breweries and Bottling Plants, as well as food related vehicles including fork lift trucks, floor cleaning machines, etc. Free from Lead, Animal Fats and is formulated in compliance with FDA, Title 21, Section 178.3570.

- Prevents slipping
- Increases transmitted power.
- Colourless - Non Toxic. Does not dry out.
- Effective in damp conditions. Prolongs belt life.
- Temperature Range -5°C to +100°C.
